[DINING CHAIR] Instruction Manual

DINING CHAIRS

A good dining chair is a keeper of memories.
It witnesses the everyday and the extraordinary:

Quiet solo breakfasts.

Celebrations that stretch late into the night.

First dates.

Anniversaries.

Family traditions that will outlive us.

Crafted with care, designed for comfort
— its proportions invite a natural posture.

Its textures — wood, leather, woven fiber, soft upholstery

— speak of warmth and tactility.

Its silhouette complements your space, be it minimalist, rustic, or
modern — always elevating the experience of gathering.

Close your eyes. Picture your dining room.

Not just a table, not just chairs — but a stage for life's most
beautiful moments.

Your dining chair is a silent companion to them all.

When you choose a dining chair, you are not choosing furniture.

You are choosing a feeling:

The joy of welcome.

The art of lingering.

The embrace of connection.

— *the art of stillness*

Parts List

A

backrest

x1

B

seat

x1

C

leg

x1

D

screws M6*35

x3

E

screws M6*45

x4

F

flat washers M6*14

x4

G

hex key

x1

Installation

STEP 1

- Align the holes of the seat (B) with the metal frame (C)

STEP 2

- Place 4 screws (E) and washers (F) in the corresponding holes
- Tighten them with a hex key (G).

Do not tighten the screws if they are not aligned with the holes!

Installation

STEP 3

- Align the holes of the backrest(A) with the metal frame(C)
- Place 3 screws(D) in the corresponding holes
- Finally tighten them with a hex key(G).

FINISHED

Do not tighten the screws if they are not aligned with the holes!

Dining chair

Description:

This dining chair is inspired by modern minimalist design, emphasizing clean lines and functional elegance. The sleek silhouette and the gentle curve of the backrest are reminiscent of mid-century modern furniture, which is known for its timeless appeal.

Crafted with a combination of materials that offer both durability and comfort, this chair features a sturdy iron frame that ensures stability and longevity. The use of iron not only adds to the chair's robustness but also contributes to its sleek and contemporary look.

Perfect for a variety of settings, from a modern kitchen to a chic dining room. Its neutral color and simple design allow it to blend seamlessly with a range of decor styles.

Material:

- **Frame:** metal+plywood+sponge
 - **Base:** metal base with black powder coating
-

Notice

- Please use the chair after you are fully familiar with the useage and operation.
- Please don't play on the chair.
- Please use the product correctly. It is prohibited to stand or lie on the product, and it is strictly prohibited to use it for other purposes such as ladders.
- This product can only be used when all screws and parts are tightened. Check the tightening screws and parts at least every three months.
- If any part is missing, damaged or worn, please stop using the chair, and use the accessories provided by us to repair or contact after-sales service.
- This product is designed for one person, and only one person can use it at a time.
- Please keep the chair away from fire.

Maintenance

Furniture should be arranged to avoid touching walls or heat sources to prevent damage from heat and moisture. As a general rule, it is recommended to lightly vacuum the furniture every week to get rid of dirt, dust, hair etc. and rotating reversible cushions frequently. Adding this simple step to your cleaning process will extend the life of your furniture significantly. Colours on textiles are also prone to light fading. Exposure to direct sunlight will damage fibres as well as dull colours, over time this will make the fibres brittle and cause them to break. Avoid direct sun where possible or hang protective curtains.

1) Piling

Piling may occur as a result of normal everyday use. It is a natural occurrence when loose fibres on the surface begin to twist. Pills can be removed with a small, electric 'de-pill' and will not damage the fabric.

2) Overall cleaning

- How often your furniture needs cleaning will depend on your personal use and household. As a general recommendation most family room furniture should receive proper cleaning every 12 months. With furniture that sees 'normal wear', a yearly cleaning will preserve and enhance wool or woolblend upholstery.
- Furniture that might be near food and beverages may need to be cleaned more often, as well as ones used by children and pets.
- It is important to make sure you use the right cleaners for your upholstery as the wrong one might cause fading, staining etc.
- Only use products designed for upholstery, and avoid any cleaners made for hard surface cleaning like ammonia, soap or bleach.
- Some fabrics and covers can be washed in the washing machine, however this depends on the type of textile and the backing used.
- If unsure, always use a cold wash cycle and non-dyed detergent.
- Avoid dryers.

Maintenance

3) Spills and stains

With small spills and stains, time is of essence and spot cleaning should be the first step. Most stains can be avoided if treated right away. Most stains can be cleaned with water, upholstery shampoo or a suitable spot cleaner. Do not leave stains to dry as this will make them harder to clean. Wipe up any excess liquid or solids, and with the right product work from the edge of the stain inwards to avoid spreading.

4) Spot cleaning

If you do not have a stain remover, here are some recommendations on how to deal with the most common stains:

- **INK** - Moisten with warm glycerine. Leave for 10 minutes. Apply liquid detergent and brush lightly. Blot with water and dry quickly. Upholstery shampoo can also be used for this.
- **ALCOHOLIC BEVERAGES** - After the moisture has been blotted up, dab at the stain with a clean cloth dampened in rubbing alcohol. Then blot repeatedly with liquid detergent mixed with cool water. Blot dry with a towel. Dab again with clear cool water and blot dry.
- **COFFEE/TEA** - Sponge with warm water. Apply warm glycerine. Leave for 30 minutes. Flush out with water and dry quickly.
- **BLOOD** - After the moisture has been blotted up, dab at the stain with a clean cloth dampened in rubbing alcohol. Then blot repeatedly with liquid detergent mixed with cool water. Blot dry with a towel. Dab again with clear cool water and blot dry.
- **CHEWING GUM** - Rub an ice cube over the gum to harden it, then scrape off the excess with a dull knife. To remove what's left, use dry cleaning fluid.
